1.6) Please enter any feedback on the Teaching Assistant below.

- - Great Tutor, enthusiastic and cares about students' learning
  - Great: preliminary reading on vectors / matrices ensured that everybody had a similar basic knowledge
- Even if was the first time giving class, the teaching assistant was enthusiastic and really helped students to understand the topic.
- Excellent tutor - clear and concise teaching of occasionally complex subject matter
- Give very useful feedback.
- He is a great tutor with power, knowledge and humor.
- Maybe focus more on past papers
- One of the best professors in my opinion. His tutorials covered not only excercises and practical examples but very clearly offered a recap of every lecture as well. Very helpful during the office hours and very enthusiastic about teaching and about the module.
- The TA was extremely knowledgeable and helpful in his tutorials. It forms the bulk of my learning for this module.
- The TA was very knowledgeable about the module, and clearly explain what I find hard to understand during the lecture. I enjoyed attending the tutorials every week.
- The tutor for this course was excellent and every tutorial helped enhance my understanding of the topic greatly!
- Very good job. Keep up
- Very helpful TA, if not the best one of the term. Class recordings were very helpful, sound was clear. The additional background notes as well as the answers for problem sets were very detailed and helped in understanding. Thus I would have liked a longer session, maybe 1.5 hours instead of 1 hour. This would have also helped in covering more examples.
- Well done
- very helpful
