Comments Report

1. Teaching Assistant

1.6) Please enter any feedback on the Teaching Assistant below.

- Always prepared and very clear.
- He tried to explain the concepts of the class really hard. He was also good teaching them. Good work!
- Hormoz delivers well-structured tutorials and is always willing to answer our questions
- Hormoz has a fantastic teaching style and is always ready to help out with questions.
- Hormoz is great, he’s very patient and always providing detailed and sensible explanations for concepts. He’s actually the one clearly teaching the core models of this module. Quick feedback of questions.
- Hormoz was always willing to explain and adapt his tutorials to facilitate the poor teaching of Alex
- I think he was overall good and put a lot of effort into making us understand the materials.
- Needs to link with the lecture material more, but I think that was because the lectures were so bad, that it was hard to teach the tutorials.
- Not enough exam time questions -both mcq or long answer. Most of the tutorials were on coding so are of zero help for the exam. Need a lot more practice of exams style questions and questions relating to theory in the lectures and much less focus on coding.
- Tutorial was not effective since it was not really aligned with this lectures.
  My proposal is to replace this really bad professor with the TA.

  But I understood that it is standard at Imperial that nothing makes sense and is really planned.....

  So, good job of the TA, but not helpful for the module and weird teaching style of the "professor".
- Very helpful
- Very helpful
- Way to go, Hormoz!
- completely useless
