1. Teaching Assistant

^{1.6)} Please enter any feedback on the Teaching Assistant below.

- Always friendly and helpful
- Excellent and amazing!
- Good at explaining
Responsive to the requests
- Good job.
- Great Teaching Assistant. His way of teaching is easy to understand and is always willing to help with doubts. Thankful for his use of the visualizer and code examples.
- He is a good TA. Sometimes I feel like the tutorials are not really related to the lectures and that they are maybe not focusing on the same concepts. But all in all really good.
- He tried to put lots of stuff in the one-hour tutorial. Some are beyond the scope of the course. With his knowledge, he could help us more by focusing on explaining the course material and cutting down the materials to be covered. Because copying what he wrote took time as well, there would be no time to think if we were busy copying.
- Hormoz is awesome.
- Make tutorial questions more in-line with lectures
- Make tutorials more related to lecture slides topic
- Sometimes he makes the problem a bit more complicated by involving a lot of theories in statistics.
- The TA is very good at explaining stuff and I am able to understand how to solve the questions in his tutorial. He is also very patient at explaining things and knowledgeable at the topic he teaches.
- love Hormoz. he knows what he is doing and he is extremely helpful in every way possible
- very useful and clear to understand
